

CEWELD OA 57

TYPE	High-alloyed tubular wire on a C-Cr. carbide basis for extreme hard deposits on parts subject to strong mineral abrasion.
ANWENDUNGEN	Rebuilding and or protecting wear parts against extreme abrasion with low impact.
EIGENSCHAFTEN	High C-, Cr- alloyed flux-cored wire electrode which forms extremely hard carbides for extremely hard deposits on parts subject to excessively heavy abrasive wear weldable without protective gas. More than 3 layers should not be deposited. A Buffer layer with OA 4370 or OA MnCr is recommended in case of old layers or critical base metals.. Equivalent in SMAW: Dur 62S
KLASSIFIKATION	EN ISO 14700: T Fe15 DIN 8555: MF 10-GF-60-65-G
GEEIGNET FÜR	60-64 HRc hardfacing alloy, Cement, Mineral mixing peddles, coke wear plates, Fan blades, screw conveyors, pumps etc.
