

# CEWELD SPA FeAl5

|                       |                                                                                                   |
|-----------------------|---------------------------------------------------------------------------------------------------|
| TYPE                  | Cored wire for the thermal spray process                                                          |
| TOEPASSINGEN          | Rough surfaces against sliding and or applications that require a smooth finish after machining.  |
| EIGENSCHAPPEN         | Aluminium alloyed tubular wire for electric arc spray on a Fe-Al basis with high bond strength.   |
| CLASSIFICATIE         |                                                                                                   |
| GESCHIKT VOOR         | Coating walking surfaces against sliding, stairs, traction wheels and rollers, buffer layers etc. |
| GOEDKEURINGEN         |                                                                                                   |
| LASPOSITIES           |                                                                                                   |
| MECHANISCHE WAARDEN   |                                                                                                   |
| HERDROGEN             | Not required                                                                                      |
| GAS ACC. EN ISO 14175 |                                                                                                   |
